# THAMIRABHARANI ENGINEERING COLLEGE

AUTONOMOUS

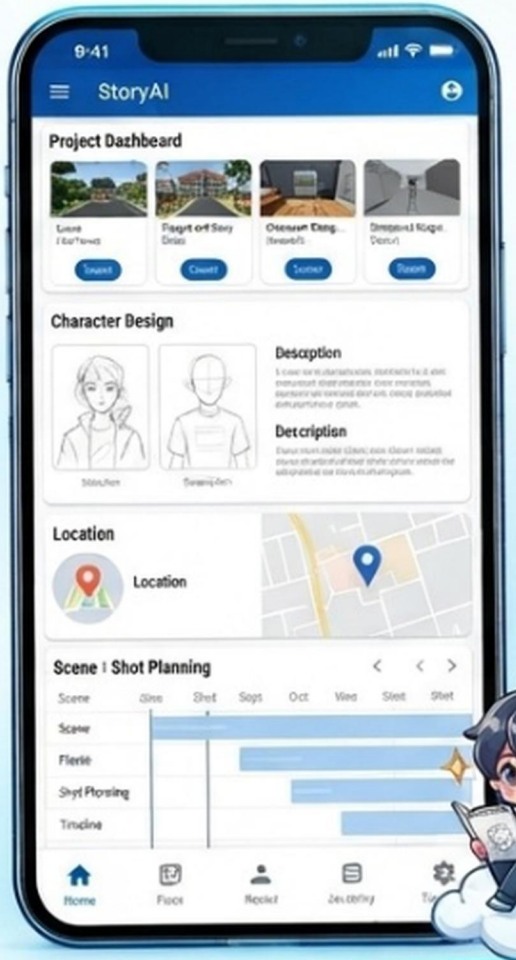

*From Imagination to Storyboards*

# StoryAI

StoryAI is an AI-assisted storytelling and storyboard development platform that helps users organize creative projects, maintain consistent characters and locations, develop stories, and plan scenes and shots in one workspace.

## Key Features

- AI-Assisted Story Development
- Project and Story Management
- Character Design Sheets
- Location Management
- Scene and Shot Planning
- Story Continuity Support
- Storyboard Export

## How It Works

User Input (Text/Voice) → StoryAI Core Processing → Structured Output (Storyboards, Sheets, etc.)

## Technology Stack

Python · Flask · SQLite · HTML, CSS, JavaScript

OpenI API / Local AI Integration

## Future Enhancements

- Advanced AI-assisted story-branching
- Integrated voice-to-scriptwriting
- AI-generated 3D location visualization
- Collaborative project features
